

For Immediate Release

Apex, North Carolina  
09/1/2005

The Charles Ray III Diabetes Association is actively asking everyone from ordinary citizens to CEO's in corporations to donate money, new bottles of insulin and diabetic items to our organization so that we can send them to New Orleans to assist diabetic during this disaster. We need glucose meters with testing strips, lancet devices, lancets, alcohol swabs, etc.

The Charles Ray III Diabetes Association provides free diabetic testing supplies to those who are unable to afford the cost. The association was started in 1998 and has assisted many diabetics in need from Apex North Carolina to Florida, Canada, and New Zealand. Feedback received from numerous diabetics tell us that The Charles Ray III Diabetes Association is the only diabetes organization that provides such a well needed service.

The painted letters "DIABETIC" on a rooftop seen from news medias says it all!

"It's a great example of how if we are working together as we should, we can really help some people." (Quote from Alan Levine, Florida Agency for Healthcare Administration)

We especially hope that Gov. Mike Easley will jump on board with The Charles Ray III Diabetes Association and help with this mission.
